**UTAH BROADBAND ADVISORY COUNCIL
MEETING**

JULY 15, 2014

UTAH BROADBAND PROJECT ACCOMPLISHMENTS

Launched Utah's First Interactive Map

Formed the Utah Broadband Advisory Council

Completed an Extensive Regional Broadband Planning Effort

Hosted a Statewide Broadband Tech Summit

Completed Statewide Surveys to Determine Adoption Trends

UTAH BROADBAND PROJECT KEY INITIATIVES

Convene Partners to Increase Deployment

Market Utah's Cutting-Edge Infrastructure

Advocate for Utah on the National Stage

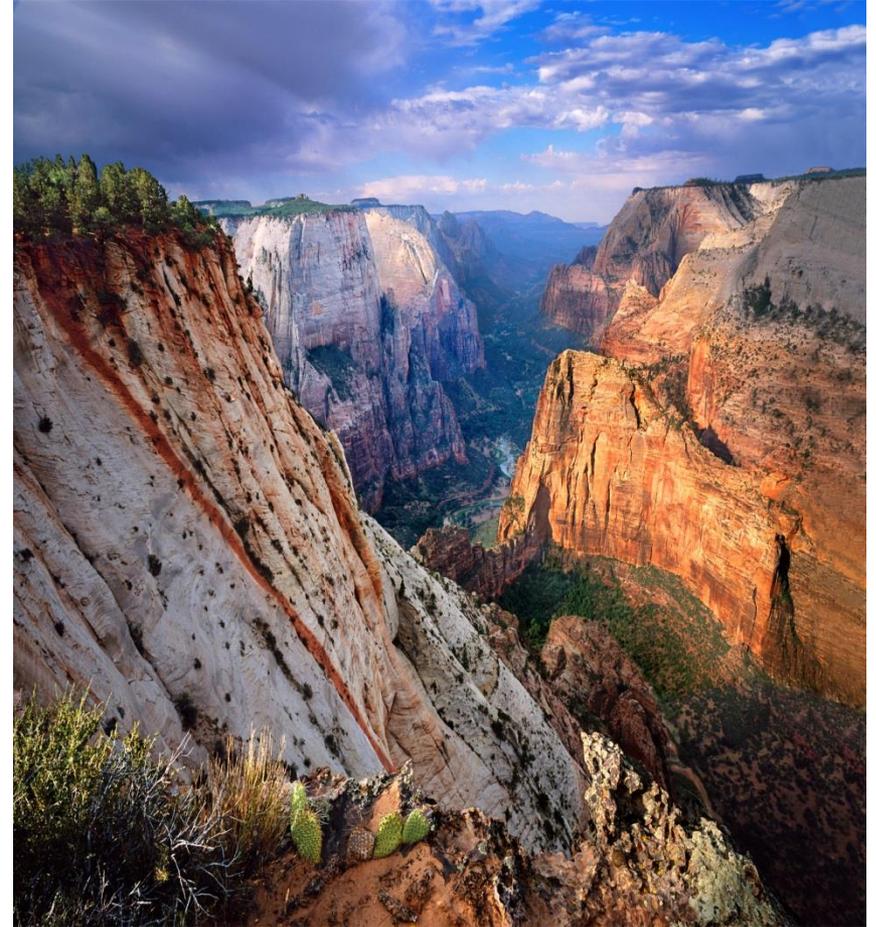

Help Communities Increase Speeds

Identify Funding and Partnership Models

Give Utah Students the Tools to Succeed

Connect Healthcare and First Responders

Link Rural Utah to a Global Marketplace

CONVENE PARTNERS TO INCREASE DEPLOYMENT

Continue the Utah Broadband Advisory Council to develop strategies to deploy broadband infrastructure in Utah

Work with broadband providers and communities to learn best practices for broadband deployment

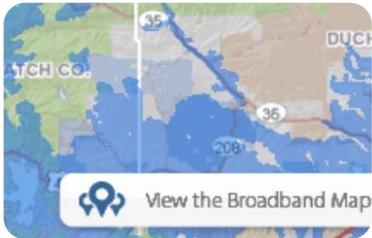

Create a business-friendly environment to encourage broadband deployment

MARKET UTAH'S CUTTING-EDGE INFRASTRUCTURE

Attract more businesses to Utah

- AOGs recommended increasing economic development by utilizing broadband

Launch the nation's first Commercial Broadband Map

- Display commercial broadband data to support corporate recruitment

Teach local communities to market existing infrastructure

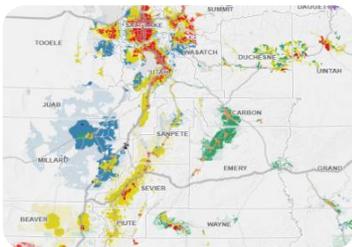

ADVOCATE FOR UTAH ON A NATIONAL STAGE

Utah Broadband Project will serve as a state policy advisor for broadband-related public policy issues

Encourage federal policies that will improve Utah's infrastructure, as well as educate state leadership about the impacts that federal changes will have on broadband deployment and providers

Continue a state-led data verification effort to work with the FCC to ensure data collection will meet the needs of Utah's stakeholders

HELP COMMUNITIES INCREASE SPEEDS

Identify Utah's underserved communities

Help communities increase broadband deployment by implementing best practices

Encourage investment in underserved communities

IDENTIFY FUNDING AND PARTNERSHIP MODELS

Link communities with funding sources

- Work with broadband providers, communities and other stakeholders to seek funding opportunities

Work with public entities and providers to increase statewide coverage

- Promote public/private partnerships and assist by identifying underserved areas of the state

GIVE UTAH STUDENTS THE TOOLS TO SUCCEED

- Support and partner with UETN to continue connecting schools and libraries
- Increase wireless infrastructure in schools

CONNECT HEALTH CARE SITES AND FIRST RESPONDERS

- Support and partner with UETN to continue connecting health care sites
- Partner with Utah's FirstNet team to increase access in rural Utah

LINK RURAL UTAH TO A GLOBAL MARKETPLACE

Help rural businesses compete in a global marketplace

Establish a program to help businesses/cities get online

Study the impacts of businesses connectivity in rural Utah

ANTICIPATED PROGRAM OUTCOMES

Increased utilization of federal funds for broadband infrastructure

Increased utilization of best practices for broadband deployment

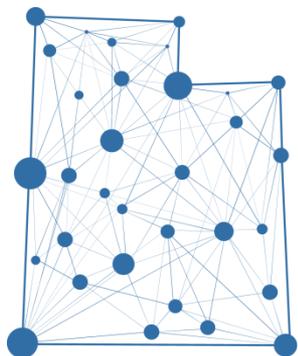

High-speed connections to all schools, libraries and tribal centers by 2019

Access to commercial broadband data for business recruitment by 2016

Annually aid 200 businesses to establish a website or other online presence with the goal of increasing revenues
